

PIRS – Highlights and Improvements

Release 3.78

Allow selection for computed approval workflows

In case of computed workflow configurations it is possible to allow manual selection in addition.

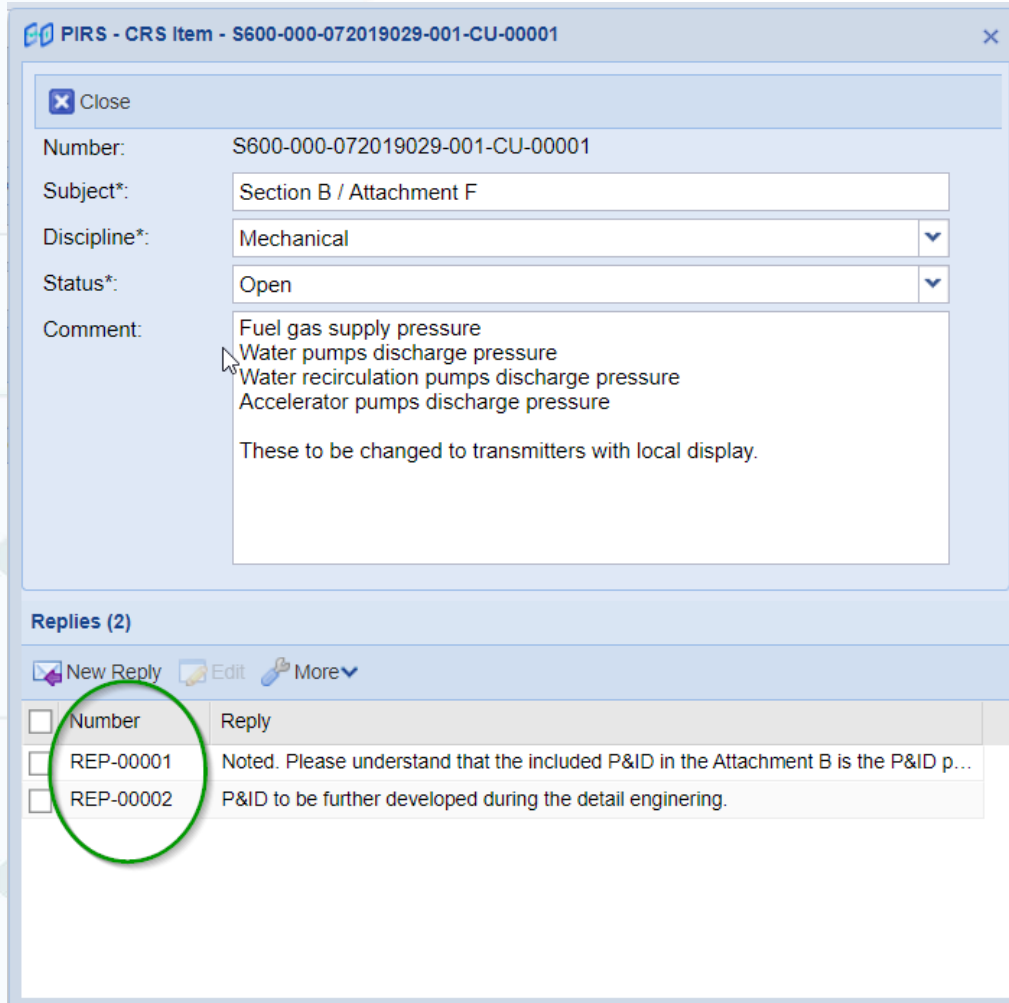

This ensure that users have still the control about the workflow they want to use.

If a new workflow configuration is available then the computed workflow switches to the latest valid revision.

Please talk to SOBIS to setup workflow accordingly.

Introduce new number for CRS Replies

PIRS - CRS Item - S600-000-072019029-001-CU-00001

Close

Number: S600-000-072019029-001-CU-00001

Subject*: Section B / Attachment F

Discipline*: Mechanical

Status*: Open

Comment:
Fuel gas supply pressure
Water pumps discharge pressure
Water recirculation pumps discharge pressure
Accelerator pumps discharge pressure

These to be changed to transmitters with local display.
