

PIRS – Improvements

Release 3.55

New workflow option for document distribution

There are new workflow related options available to control how documents are distributed:

Old Option	Change / Improvement
Always allow distribution	No change
Final completion is required...	Fixed and renamed
Allow distribution except...	No change
Allow distribution only when...	New option

New optional column Application Code in TS Actions

The Application Code field of Documents can be added as new column to Transmittals:

Subject*: Attached you will find our documents
