PIRS 3.10

Highlights

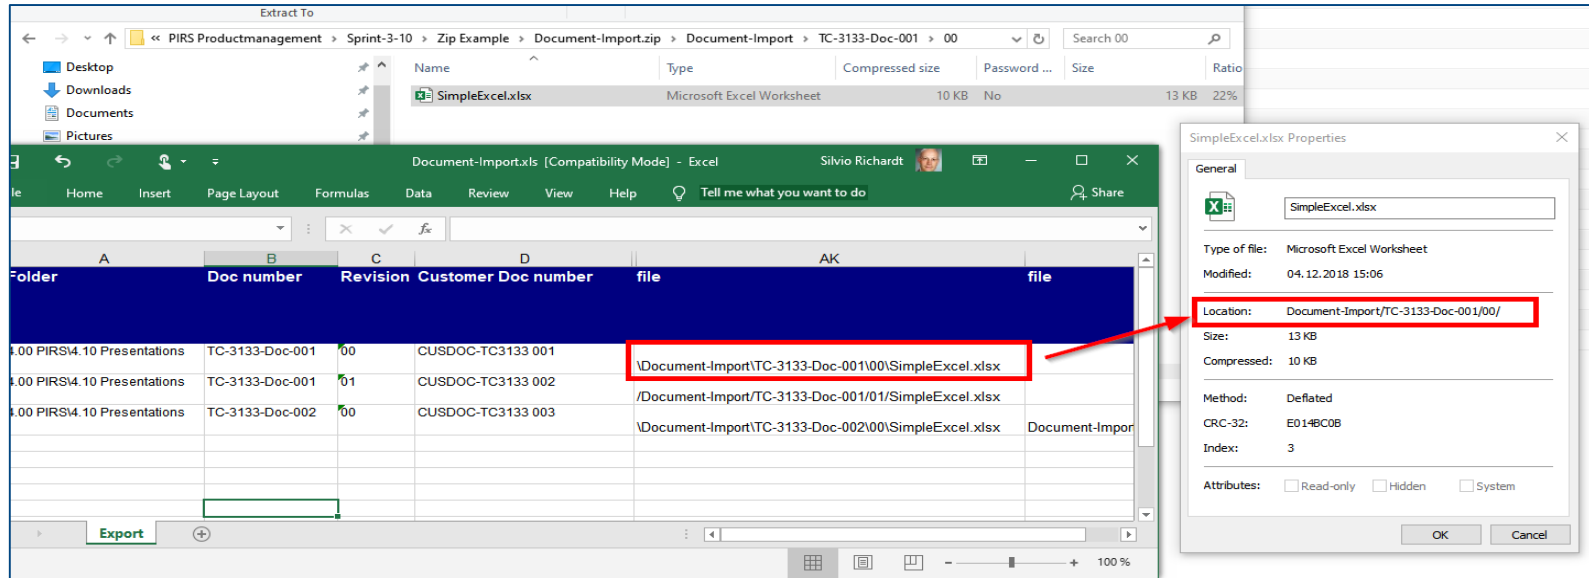

Import document files via zip

Document files (attachments) can now be imported via zip file. There is no need anymore to use a FTP server.

Import document files via zip

1. Zip your files
2. Add the (relative) location of the file(s) to your Excel Import Sheet
3. Select import sheet and zip file and start import

The screenshot shows a Windows File Explorer window displaying a zip file named 'SimpleExcel.xlsx' (13 KB) within a folder structure: 'PIRS Productmanagement > Sprint-3-10 > Zip Example > Document-Import.zip > Document-Import > TC-3133-Doc-001 > 00'. Below this, an Excel spreadsheet titled 'Document-Import.xls' is open, showing a table with columns: 'Folder', 'Doc number', 'Revision', 'Customer Doc number', 'file', and 'file'. The 'file' column contains paths like '\\Document-Import\TC-3133-Doc-001\00\SimpleExcel.xlsx'. A red box highlights one of these paths, with a red arrow pointing to the 'Location' field in the 'SimpleExcel.xlsx Properties' dialog box, which also contains the same path. The dialog box also shows file details: Type of file: Microsoft Excel Worksheet, Modified: 04.12.2018 15:06, Size: 13 KB, Compressed: 10 KB, Method: Deflated, CRC-32: E014BC0B, Index: 3, and Attributes: Read-only, Hidden, System.
